

Lydia Nishimwe

PHD STUDENT IN MACHINE TRANSLATION

My thesis focuses on the **robustness of neural machine translation** models against the **non-standard text** found in **user-generated content** on social media.

Research Fields

- Machine Translation
- Lexical Normalisation
- Language Models
- Sentence Embeddings

Education

■ Ph.D. in Computer Science

Centre Inria de Paris / Sorbonne Université

October 2021 – Present

Paris, France

- Thesis topic: **Robust Neural Machine Translation**
- PhD supervisors: **Benoît Sagot** and **Rachel Bawden**

■ M.Eng. in Mathematics and Computer Science

École Centrale de Nantes

September 2017 – May 2021

Nantes, France

Specialisations:

- 3rd Year: **Applied Mathematics**
 - Track: **Statistics and Data Science**
 - Professional Track: **R&D**
- 2nd Year: **Computer Science**
 - Exchange semestre at the Polytechnic University of Madrid : **Organisational Engineering**

■ B.Sc. in Mathematics and Computer Science

Université Grenoble Alpes

September 2014 – July 2017

Grenoble, France

Work Experience

■ Internship – Research and Development

Orange Labs

June 2020 – December 2020

Lannion, France

- Title: **Inference of masked sequences**
- Environment: LaTeX, Python, TensorFlow, Keras
- Keywords: **(non)-autoregressive and (non)-monotonic seq2seq models, unmasking logs**

■ Internship – Software Development

Mean-In-Full

May 2017 – July 2017

Meylan, France

- Title: **Integration of the learning management system Opencast with the RoCamRoll software**
- Environment: Linux, LaTeX, Erlang, HTTP

■ Internship – Assembly Programming

Laboratoire TIMA

Grenoble, France

May 2016 – June 2016

- Title: **Functional verification of an ARM7 microprocessor**
- Environment: Linux, LaTeX, VHDL, C, ARM

■ Internship – Functional Programming

Laboratoire VERIMAG

May 2015

Grenoble, France

- Title: **Simulation of GPS tracks**
- Environment: Linux, LaTeX, Lutin, Lustre
